Re: FERC Dockets CP16-454 and CP16-455

Dear FERC Commissioners,

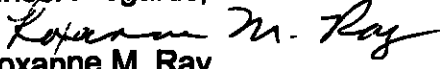

This letter is to express our continued support for the construction of the Rio Grande LNG and Rio Bravo Pipeline facility on Texas State Highway 48, in Cameron County, adjacent to the Brownsville Ship Channel.

As we have watched the permitting process progress, we have been pleased to see that Rio Grande LNG has responded promptly and effectively to public questions and concerns. Further the successful review by the Texas Commission on Environmental Quality confirming that emissions from the proposed facility will not have a significant impact on soils, vegetation or visibility is encouraging.

In our many meetings with representatives from RG LNG, we have been impressed by their commitment to high standards of operations. The economic impact of this project will be significant, and already RG LNG leadership has become actively involved in our community, communicating with local representatives and sponsoring numerous community events and activities.

Our support for the project started nearly two years ago and remains today. We are pleased the project is advancing.

Sincere regards,

Roxanne M. Ray
President/CEO
